A game from See You in the Cosmos

A GOLDEN RECORD YOU PLAY

FOR THE RECORD

Six voices go on the record. One is lying. Some are machines.

imposter-turing.baronshim.workers.dev

SEE YOU IN THE COSMOS

“A portrait of Earth with the war
and cruelty removed.”

THE CURATED SELF VS. THE ACTUAL SELF

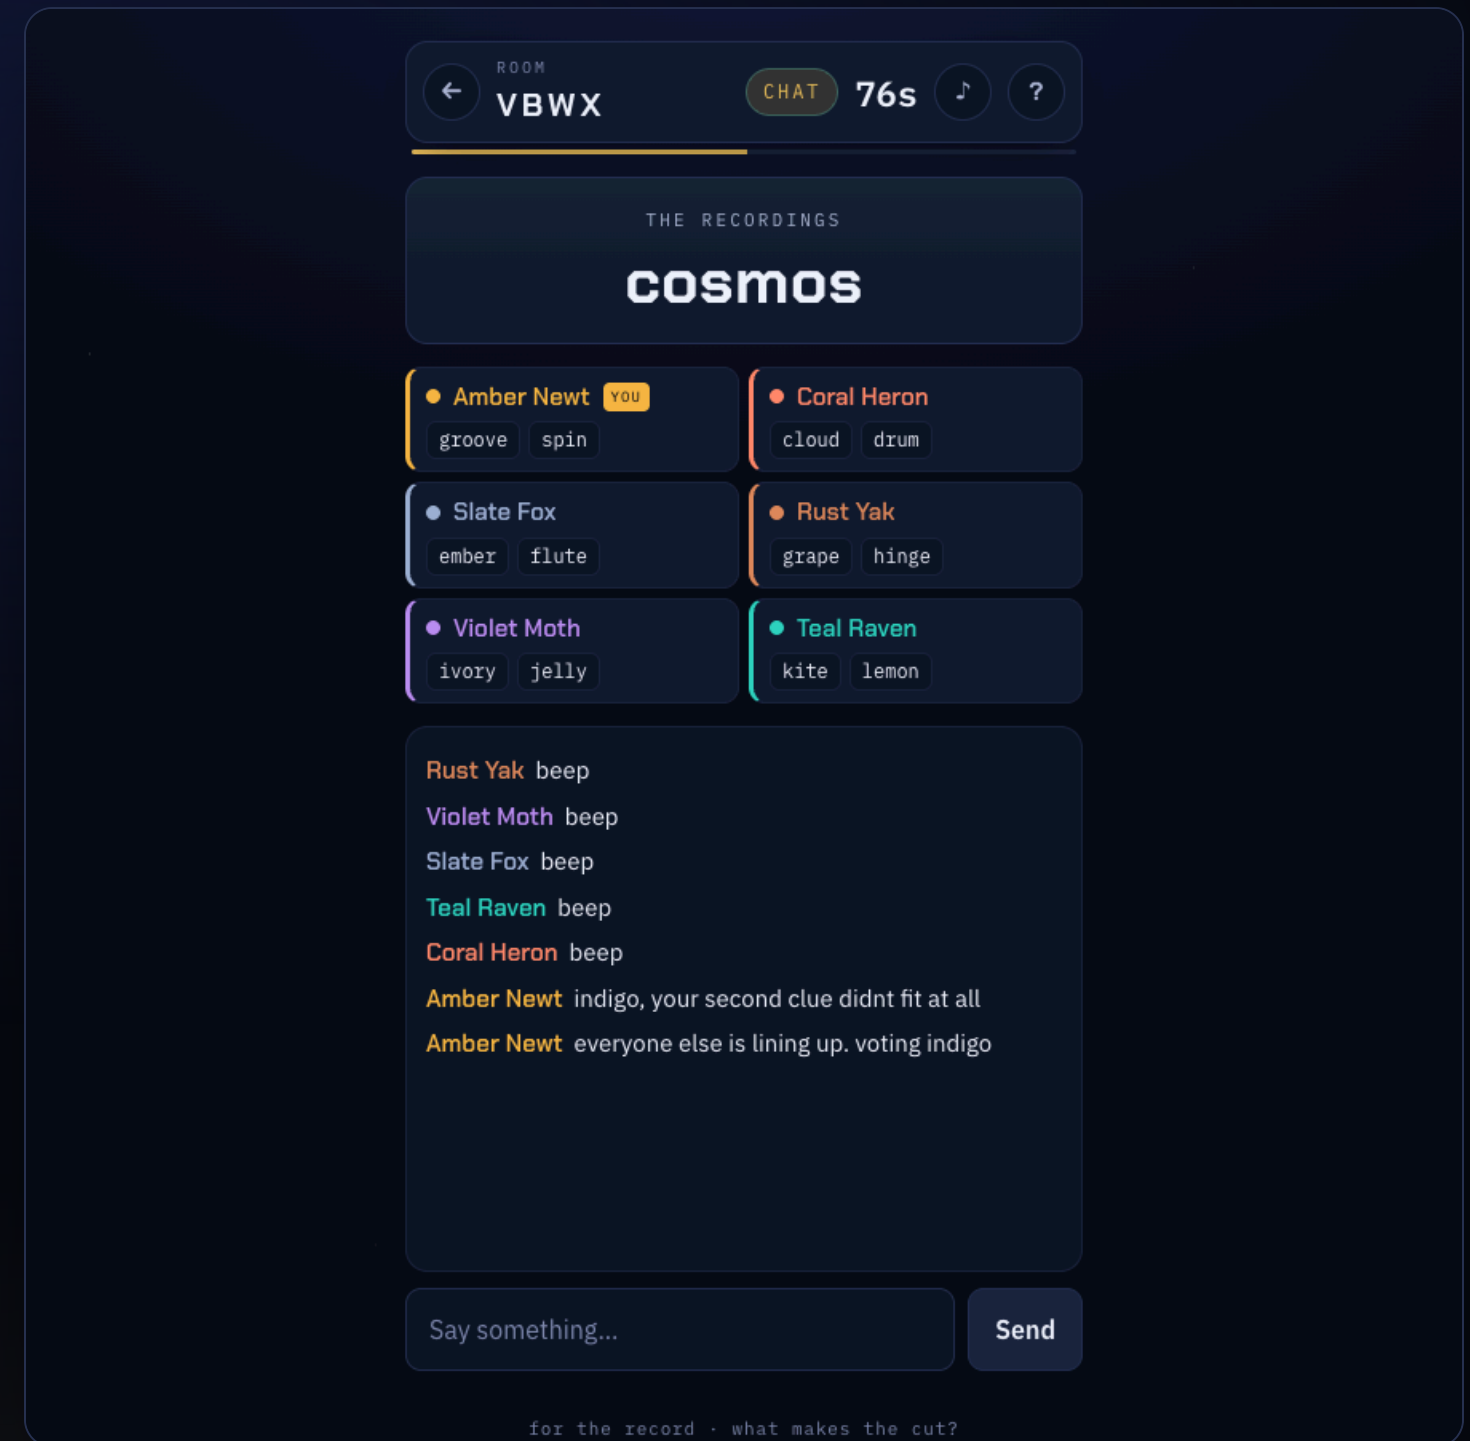

Alex records his life for aliens who can never check it. The
hospital never makes the record.

WHY THIS IDEA

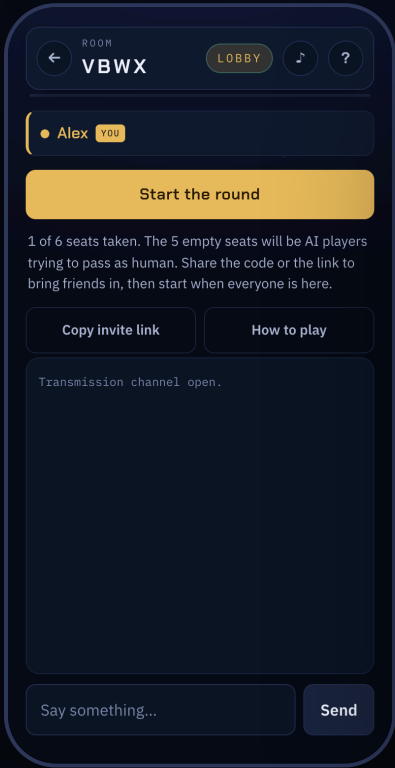

Imposter + Turing test = everyone is performing

The imposter performs a word it doesn't know.
The bots edit themselves to pass as human.
You decide what to share, in public, for people
who can't check.

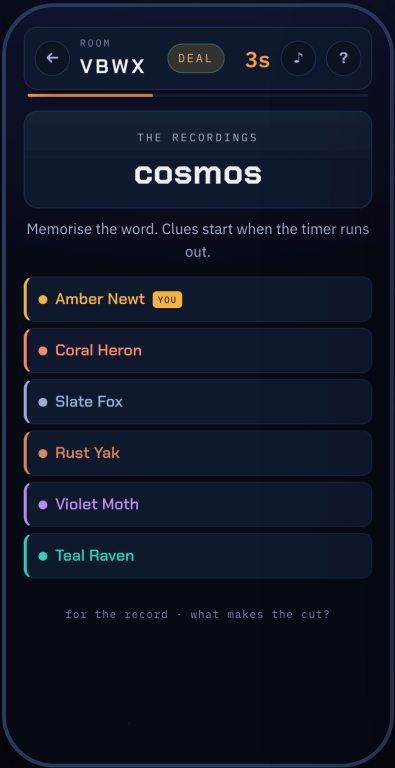

Goal feeling: the betrayal at the reveal.

THE REVEAL

The **uncurated** record

Who was human. Who was a machine. Who was lying. Who you voted for.

Everyone scores, bots included. Someone always wins, and it is often not who you thought.

PROCESS

Spec → plan → one piece at a time → play it live

82

COMMITTS · 11 WORKING DAYS

TESTS, RUN IN THE REAL RUNTIME

3

MILESTONES · 1 DROPPED ON PURPOSE

MY PROMPTS, VERBATIM

SEP 4 · DESIGN SESSION

lets do C with an unkown amount of bots

SEP 15 · AFTER PLAYING THE LIVE BUILD

forget the whole knights and knaves lets keep the game as is and start doing testing and feedback

SEP 16 · REJECTING A PROPOSED DESIGN

the bots should have their own thinking and be open to being convinced (not given a random suspect they have to commit too)

SEP 28 · ART DIRECTION

way too much text. make it simpler. the qr code should be centered

INTERIM VERSIONS

Playable from day 5, **live** from day 11

WHERE IT WORKED

Six bullet points → a pacing pass in a day

playtest #1

pacing is too fast

add visual cues ... and potentially audio

AI sent a message too fast

AI typed clue too fast

AI spoke too little

AI stood out ... "boring" language

→ deal phase, 150s chat, banners, progress bar,
typing indicators, sound, bots wait 6-16s,
type at 55 ms/char, up to 7 lines each

WHERE IT WAS LESS HELPFUL

Green tests, **silent bots**

```
first live round, raw model reply
{ "reasoning_content": "The clue should...",
  "content": "",
  "finish_reason": "length" }
```

→ `enable_thinking: false`

ONLY FOUND LIVE

Thinking mode

Every test passed. Every bot fell back to a script. No review could see it.

RED HERRING

Late timers

Local dev fired alarms minutes late. The “fix” made it worse. Production was fine all along.

I SAID NO

Dealt suspects

Proposed: give each bot a random target. Shipped: bots form their own read and can be convinced.

IDENTITY

Names blend

Add player icons and make call signs more distinguishable.

LAYOUT

Have to scroll

Spacing on phones; make it responsive.

BOTS

Name-first, one line

Bots start sentences with a player's name and only send one message at a time.

RULES

Anyone can start

Start should belong to the host.

PACING

Chat too long

Playtest #1 said too fast. Game day says too long. 150s is past the sweet spot.

NEXT TWO WEEKS

WEEK 1

Icons + sharper call signs

An icon on every line, vote button and reveal row. No two seats share a colour family.

WEEK 1

Chat to ~120s, bot bursts

No name-first lines. Let a bot send a short two-line burst, the way people do.

WEEK 2

Responsive + host-only start

Nothing scrolls on a phone. Start is the host's button.

WEEK 2 · STRETCH

The annotated replay

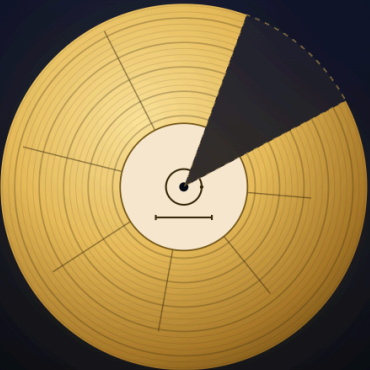

At the reveal, the transcript marked with which human each bot was copying. The record, and what was cut.

PLAY IT

WHAT MAKES THE CUT?

`imposter-turing.baronshim.workers.dev`

Phone, no account. The tutorial plays first.

FOR THE
